California Laws Require Proper Waste Sorting

➤ Assembly Bill 1826 requires **CalRecycle** businesses to implement an organics recycling program. Currently, it targets those generating 4 cubic yards or more of organic waste per week. On January 1, 2019, the law will apply to those generating 4 cubic yards or more of garbage per week.

➤ Assembly Bill 341 requires businesses and multifamily dwellings to separate recyclable materials from their garbage and either allow the collection of recyclables by SSF Scavenger or self-haul to a recycling facility. The law applies to businesses that generate four or more cubic yards of garbage per week and to all multifamily dwellings with 5 or more living units.
