

The Climate Registry

FOR IMMEDIATE RELEASE

Climate Registered status achieved by South San Francisco Scavenger Company

MARCH 1, 2018, SOUTH SAN FRANCISCO— South San Francisco Scavenger Company achieved Climate Registered™ status by successfully measuring its carbon footprint according to The Climate Registry's best-in-class program, then having it third party verified and reporting the data on The Registry's website. South San Francisco Scavenger Company joins more than 300 other leading organizations across North America in adopting a truly sustainable approach to doing business.

Measuring their carbon footprint with The Registry allows South San Francisco Scavenger Company to prepare for future regulation, identify inefficiencies and potential for cost savings, and provide real and meaningful data to their customers and shareholders about their environmental performance. It is the first step towards reducing their energy usage, costs and carbon emissions.

"It is our goal to operate in a way that helps our communities achieve zero waste, while significantly reducing our overall GHG emissions," explains Doug Button, President of South San Francisco Scavenger Company.

"Climate Registered organizations understand that there are both environmental and economic benefits to understanding and managing your carbon footprint," said David Rosenheim, Executive Director of The Climate Registry. "South San Francisco Scavenger Company has become part of a powerful community of Climate Registered organizations, with substantive data guiding and supporting its sustainable activities."

About The Climate Registry

The Climate Registry is a non-profit organization that operates the only carbon footprint registry in North America supported by states, provinces, territories and tribes. The Climate Registry helps hundreds of public and private organizations measure, report and reduce their greenhouse gas emissions with integrity.
